(3677)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill at the above location with cable tools to an approximate depth of 4000 feet in the Seven Rivers. A string of 13 3/8" casing to be cemented at 200 feet; 10 3/4" casing to be mudded at 750 feet and 8 5/8" casing mudded at 1290 feet. An oil string of 5 1/2 inch casing will be landed at approximately 3990 feet, the 8 5/8, and 10 3/4 inch casing will be pulled and the oil string cemented to surface with approximately 1500 sacks cement.

* Cement must be circulated on the 13 3/8" surface casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
