The elevation of the derrick floor above sea level is 3730 ft.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to treat the subject well down 5 1/2" casing with 20,000 gallons lease oil and 60,000# sand. Present production is 3 bbls oil and 14 bbls water per day.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
