The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of the objects, show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement- and filled for as being _____ ft. from the north line and _____ ft. from the east line of Section 29.)

Due to quite a geological advantage to be gained structurally, Calco has elected to stake and drill its No. 2 location of the following site: 890 ft. from the north line and 1650 ft. from the east line of Section 29, Twp. 19-S, Rn 35-E, Lea County, New Mexico. (Please refer to the attached certified surveyor's plat.)

A 890 ft. location on the northline fell within the tank battery site and installation.

I understand that this plan of work is tentative and subject to change by the District Engineer and may be commenced.
