Re: Final Approval of State Lea 688
Well No. 1 Located in Unit A of
Section 25, T-20-S, R-35-E

Gentlemen:

Recently an inspection was made of the above captioned location and it was found that some junk had been left scattered around the location, a number of boards left stacked around the cellar, the location had not been properly leveled, and the tiedown or dead men had not been cut or removed. Further, the abandoned battery location must also be cleared and leveled in regards to the pad and burn pit.

Please notify this office when the above work has been done, and another inspection will be made. If the location is found to be in accordance with the Commission Rules and Regulations, Form C-103 will be approved without further delay.

Very truly yours,

OIL CONSERVATION COMMISSION

Leslie A. Clements
Oil & Gas Inspector
