THE BILLYEUX MOUNTAINS

These mountains are situated in the north-western part of the island of New Guinea, and are the highest range in the island. They are composed of a series of parallel ridges and valleys, and are covered with a dense forest of tropical trees and plants. The climate is hot and humid, and the soil is fertile. The mountains are a source of food and shelter for the native people, and are also a source of timber and other natural resources.
