Title

ICR

THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

The first question which presents itself to the mind is, what was the state of the earth at first? Was it a solid globe, or a fluid, or a mixture of the two? We shall see, in the course of this inquiry, that the earth was at first a fluid, and that it has since become a solid globe.

The second question is, what was the cause of its becoming solid?

The answer to this question is, that the earth became solid by the action of fire.

The third question is, what was the state of the earth when it became solid?

The answer to this question is, that the earth was at first a solid globe, and that it has since become a fluid.

The fourth question is, what was the cause of its becoming fluid?

The answer to this question is, that the earth became fluid by the action of fire.

The fifth question is, what was the state of the earth when it became fluid?

The answer to this question is, that the earth was at first a fluid, and that it has since become a solid globe.

The sixth question is, what was the cause of its becoming solid?

The answer to this question is, that the earth became solid by the action of fire.

The seventh question is, what was the state of the earth when it became solid?

The answer to this question is, that the earth was at first a solid globe, and that it has since become a fluid.

The eighth question is, what was the cause of its becoming fluid?

The answer to this question is, that the earth became fluid by the action of fire.

The ninth question is, what was the state of the earth when it became fluid?

The answer to this question is, that the earth was at first a fluid, and that it has since become a solid globe.

The tenth question is, what was the cause of its becoming solid?

The answer to this question is, that the earth became solid by the action of fire.

The eleventh question is, what was the state of the earth when it became solid?

The answer to this question is, that the earth was at first a solid globe, and that it has since become a fluid.
