Re: Application to Dually Complete  
Gulf Oil Corporation's Graham  
State "C" No. 8, Monument Pool,  
Lea County, New Mexico.

Gentlemen:

By this letter of application, Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation's Graham State "C" No. 8, located in the C NW/4 SE/4 of Section 25-19S-36E, was completed November 10, 1936, at a total depth of 3975'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation's Graham State "C" Lease together with the location of all offset wells. The attached Exhibit "B" shows a diagrammatic sketch of the proposed dual completion.

(b) That subject well has 5½" casing set at 3835' and cemented with 175 sacks of cement. The well is an oil well producing from the open hole interval 3835-3975' in the Monument Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

1. Perforate the 5½" casing within the approximate interval of 3400' to 3600' in the Eumont Gas Pool. *Queen*
2. Set production type packer below these perforations at approximately 3775' to separate the two pay zones.
3. Produce the Monument Pool oil through the tubing and the Eumont gas through the tubing-casing annulus. *San Andres*

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Eumont and oil from the Monument is in the interest of conservation and the protection of correlative rights.

(e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.
