8-5/8" 28# 8-Shd. New Electric welded casing was set in this well at 2479' and cemented by the Halliburton Method with 500 sacks of cement.

Casing and fittings were tested with 1200# pump pressure and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the cement plug was then drilled out of casing and the same test of 1200# again applied and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the drilling was then resumed.
