

NEW MEXICO STATE LAND OFFICE
OFFICE OF THE STATE GEOLOGIST
SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF	X	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL			

Hobbs, New Mexico

January 7, 1935

Mr. S. E. Hollis State Geologist,
Santa Fe, N. Mex.

PLACE

DATE

Following is a report on the work done and the results obtained under the heading noted above at the Amerada Petroleum Corporation State D Well No. 1 in the SW₁ of SW₄ of Sec. 1, T. 20S, R. 36E, N. M. P. M., (Test) Oil Field, Lea County.

The dates of this work were as follows: January 4, 1935

Notice of intention to do the work was (~~was not~~) submitted on Form SG 103 on January 3, 1935, and approval of the proposed plan was (~~was not~~) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Plug was drilled and 9-5/8" Casing was tested by building up 1000# Pressure and allowing it to stand thirty minutes. The Pressure did not drop.

THEORY OF THE EARTH AND ITS HISTORY

THEORY OF THE EARTH AND ITS HISTORY

The theory of the Earth and its history is a branch of geology that deals with the origin and development of the Earth and its various parts. It is a science that seeks to understand the processes that have shaped the Earth over time, from its formation to the present day. The theory of the Earth and its history is based on the study of the Earth's rocks, fossils, and other geological features. It is a science that is constantly evolving as new discoveries are made and new theories are developed.
