

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Monument, New Mexico

Place

March 25, 1936

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intent to do certain work as described below at the _____

Amerada Petroleum Corporation Weir Well No. 2 in NW¹₄ NW¹₄
Company or Operator Lease
of Sec. 2, T. 20, R. 36, N. M. P. M., Monument Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

6-5/8" 24# New Electric Welded casing was set in this well at 3800' and cemented by the Halliburton Method with 100 sacks cement.

Casing and fittings will be tested with 1200# pump pressure and allowed to stand undisturbed for thirty minutes. Cement plug will be drilled out of casing and the same test again applied and allowed to stand undisturbed for thirty minutes. If there is no drop in pressure drilling will be resumed.

J. A. Starkey

Monument, New Mexico.

THEORY OF THE EARTH AND ITS HISTORY

1. Introduction

2. The Earth's Structure

The Earth is a sphere of approximately 12,756 km in diameter. It is composed of several layers: the crust, the mantle, and the core. The crust is the outermost layer, followed by the mantle, and then the core. The core is further divided into the inner core and the outer core.

3. The Earth's History

The Earth's history is divided into several eras: the Precambrian, the Paleozoic, the Mesozoic, and the Cenozoic. The Precambrian era is the longest, lasting from the beginning of time to the start of the Paleozoic era. The Paleozoic era is followed by the Mesozoic era, and then the Cenozoic era.

4. The Earth's Climate

The Earth's climate is determined by several factors: the amount of solar radiation, the composition of the atmosphere, and the distribution of land and water.

5. The Earth's Resources

The Earth has several natural resources: minerals, fossil fuels, and water. These resources are essential for the development of human civilization.
