17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The intent of this operation is to squeeze off water production and re-establish oil production. We intend to squeeze cement the perforations from 3,886 - 3,917' and acidize the perforations from 3,823 - 3,876'. This well was recently acidized and it appears that all of the acid went into the bottom sets of perforations and communicated with the water table.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
