Reed A-3 Well No. 15

Hobbs, New Mexico March 17, 1958

Well No. 15 is located 1980 ft. from XXX line and 2310 ft. from E line of sec. 3
SE/4, Section 3 20S 36E NYPH
(Field) (Twp.) (Range) (Meridian)
Dumont Lea New Mexico
(County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 4,000' with rotary tools in an attempt to obtain commercial production in the Queen. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 8-5/8" casing to be set at 325' and cemented with approximately 250 sacks cement, cement to be circulated; 5-1/2" casing to be set at total depth and cemented with 1,255 sacks cement, or as determined by survey, and to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

1. The first of these is the fact that the United States has a large and growing population of people who are of Mexican descent. This population is concentrated in the southwestern United States, particularly in California, Arizona, and New Mexico. It is estimated that there are over 10 million people of Mexican descent in the United States, and this number is expected to increase significantly in the future.
