

CONTINENTAL OIL COMPANY

Box 127
Hobbs, New Mexico
August 9, 1961

New Mexico Oil Conservation Commission
Box 2045
Hobbs, New Mexico

Attention: Mr. Eric F. Engbrecht

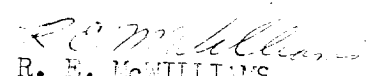

Dear Mr. Engbrecht:

Please refer to your letter of August 2, 1961.

Our Sanderson B-10 No. 2, Unit H, Sec. 10-20-36, loads with water when shut-in. The well produced 82 barrels of water and no oil in 24 hours during the test.

State D-11 No. 1 loaded up with condensate due to not being produced for approximately 60 days. We were unable to obtain the volume and gravity of this fluid. An effort will be made to do this at the next packer leakage test.

Yours very truly,

R. E. McWILLIAMS
Alternate for
District Superintendent
of Production
Hobbs District
