Sanderson B-10 No. 6 Robbs, New Mexico September 19, 1955

Well No. 6 is located 660 ft. from N line and 1980 ft. from W line of sec. 10

R1/4 Section 10 208 36E N.M.P.U.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Grant Las New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 3950' with rotary tools in an attempt to obtain commercial production in the basin. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing pattern: 8 5/8" casing to be set at 325' and cemented with approximately 250 sacks cement, cement to be circulated; 5 1/2" casing to be set at total depth and cemented with approximately 1,300 sacks cement, or as determined by survey, and to be perforated opposite the pay zone. Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
