

REPOLLO OIL COMPANY

SINCLAIR BUILDING

TULSA, OKLAHOMA

Box 1238,
Hobbs, N. M.
Dec. 20, 1939.

Mr. Roy Yarbrough,
Oil and Gas Inspector,
Oil Conservation Commission,
Hobbs, New Mexico.

Dear Sir:

I am writing you to gain permission to centralize more than five wells to one tank battery on the Wm. P. Byrd lease, located in section 11, township 20 South, Range 36 East, Lea County, Monument pool.

Wells number 2 and 5 on this lease are now making water and have to be treated. I have a treating plant at the battery that these wells flow into. It will only be a matter of time until all the wells on the lease will be making water and I do not have a treating plant at the battery used by wells number 3 and 6, therefore, it is my desire to lay a 4" flow line from the junction of wells number 3 and 6 flow lines to the battery serving wells 1, 2, 4 and 5 as shown by dotted line on plat attached. The battery serving wells 1, 2, 4 and 5 contain 4- 600 barrel wood tanks and if this request is granted I will add 1- 500 barrel tank to this battery. It will save the construction of another treating plant a cost of approximately \$ 2,500.00 and allow me to salvage one tank battery plus operating cost of the treating plant for the life of the wells.

I am enclosing a plat of the lease showing the present flow lines in solid lines and the proposed line in dotted lines.

I will appreciate your reply at your convenience.

Yours very truly,

L. Surrent
