Figure 6. The effect of the number of iterations on the accuracy of the proposed algorithm. The figure shows two plots side-by-side. The left plot is titled "Accuracy vs. Number of Iterations" and shows accuracy increasing from approximately 0.85 at 10 iterations to nearly 1.0 at 100 iterations. The right plot is titled "Error vs. Number of Iterations" and shows error decreasing from approximately 0.15 at 10 iterations to near zero at 100 iterations. Both plots have a logarithmic x-axis for the number of iterations (10, 20, 50, 100) and linear y-axes for accuracy and error.
