

NEW MEXICO STATE LAND OFFICE
SANTA FE, NEW MEXICO

DEPARTMENT OF THE STATE GEOLOGIST
NOTICE OF INTENTION TO TEST WATER SHUT-OFF

Notice must be given to the State Geologist or to the proper Oil and Gas Inspector at least five days before the test. It is desirable that a representative of the Department of the State Geologist witness the water shut-off before drilling into the productive sand whenever possible. If changes in the proposed plan are considered advisable, a copy of this notice showing such changes will be returned to sender. Submit this notice in triplicate.

Hobbs N. Mex., August 19, 19 35

Mr. E. H. Wells

State Geologist,
Santa Fe, New Mexico.

Dear Sir:

You are hereby notified that we intend to test the shut-off of water in Andrews

Well No. 1 in NW 1/4 of NW 1/4 of Sec. 12, T. 20S, R. 36E

N. M. P. M., Monument Oil Field Lea County,

on August 20, 19 35 7" in. 24 lb. casing was { cemented { in Line

formation at a depth of 3770' feet on August 17, 19 35

100 sacks of El Toro cement were used.

The method used in placing the cement was as follows: Halliburton

Fluid level will be bailed to a depth of _____ feet and left undisturbed for at least 12 hours before your inspection.

Adjacent property owners have been notified as follows: _____

Additional information:

Casing and fittings will be tested by building up 1200 pump pressure and allowing it to stand thirty minutes undisturbed. Cement plug will be drilled out and casing will be again tested with sufficient pressure to determine whether circulation can be established around casing.

Approved O. F. O'Staly 19 _____

Except as follows: 35

Sincerely yours,

Amerada Petroleum Corporation

Company or Operator.

2. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of California:

1. James M. Smith
 2. James M. Smith
 3. James M. Smith

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that are contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that are contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action to address the problem. This involves identifying the steps that need to be taken to address the problem and the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan of action. Finally, the last step in the process is to evaluate the results of the plan. This involves assessing the effectiveness of the plan and making any necessary adjustments.
