FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Total Depth - 3880', 6-5/8" OD Casing set at 3791'.

Due to an increase in water production of this well it is our intention to plug back the open hole between 3791' and 3880' approximately 25' in an effort to shut off the water. To make the plug-back we plan to use both cement & plastic. A cement plug will be spotted on the bottom with a dump bailer, followed with plastic using the same method. If satisfactory results are obtained the well will be put back on production.
