Gentlemen: Attention: Mr. G. B. Hughes

I am returning herewith an approved copy of form C-101, "Notice of Intention to Drill" your Alaska Cooper well No. 5, in Sec. 12, T. 20 N., R. 37 E. You will notice that I changed the cement program on the 7" casing from 75 sacks to 200 sacks of cement.

as you undoubtedly know, when the rules were adopted at the meeting held in Santa Fe, it was the consensus of opinion among the operators that one well per lease could be completed as a bradenhead gas well, provided the gas was used for lease and development purposes. Since I have already approved bradenhead gas programs on your Alaska Cooper Wells #1, #2, #3 and #4, I am returning herewith form C-102 unapproved.

Very truly yours,

FJV;t

Encls.

F. J. Vesely,
State Oil & Gas Inspector.
