(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 3568 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Due to declining bottom hole pressure it is impossible to keep the subject well flowing naturally. It is therefore proposed to install flow valves and gas lift with gas obtained from Sanderson A-11 No. 1 Bradenhead.

Gas used from the source well will be reported on the Monthly Report of Gas Used for Gas Lift Purposes.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company

Address Box 66

Hobbs, New Mexico
