The elevation of the derrick floor above sea level is 3570 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After a recent workover is an attempt to reduce the gas-oil ratio the subject well would not maintain natural flow. It is therefore proposed to install gas lift equipment, using gas from the Sanderson A-11 No. 1 Bradenhead.

Gas used from this well for gas lifting the subject well will be reported on "MONTHLY REPORT OF GAS USED FOR GAS LIFT PURPOSES".

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
