Sanderson A-14 No. 10

Hobbs, New Mexico September 11, 19 59

Well No. 10 is located 810 ft. from (N) line and 660 ft. from (E) line of sec. 14
NE/4, Section 14 20S 36E N47W
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Devonian Lea New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

It is our intention to drill a well at the above location to a TD of approximately 9,000' with rotary tools in order to test the Devonian pay in this area. All Casing points will be cemented in accordance with approved methods of the U.S.G.S. and any other special requirements will be complied with.

It is planned to use the following casing pattern: 13 3/8" surface string to be set at approximately 250' and cemented to the surface; 9 5/8" to be set at approximately 5,200' and cemented with 2,000 sacks; 7" to be set at approximately 9,000' and cemented with 850 sacks.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company

Address Box 427,

Hobbs, New Mexico
