## DETAILS OF PLAN OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work.)

8 5/8" OD 32. Seamless casing was set to 2663' and cemented with 500 sacks of Lone Star common cement at 8 p.m. on December 15, 1938.

The well was allowed to stand undisturbed for a period of 72 hours. After this time, pump pressure of 1200# was applied to the pipe and fittings, the valves closed, and the pressure within observed for a period of 30 minutes. There was no drop in pressure. The cement plug was then drilled and the same test again applied to the pipe and fittings. Again there was no drop in pressure.

In line with your letter of approval, under date of December 15, 1938, drilling was resumed after the second test at 5 a.m. December 17, 1938.
