17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well is currently flowing 1 to 3 BOPD from the Grayburg which is a marginal rate. Additional remedial work in the Grayburg is not considered economically feasible.

It is proposed to temporarily abandon the Grayburg zone by plugging back and recompleting in the Queen in the following manner:

1. Run Gamma-Ray- Neutron log from TD to 2000'
2. Set bridge plug at approximately 3730' on top.
3. Perforate selected intervals as determined from log and treat with 2000 gallons acid.

A subsequent report will be submitted upon completion of this work.

18. I hereby certify that the foregoing is true and correct
