

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

1. The first step in the process of the scientific method is to ask a question.

2. The second step is to do background research.

3. The third step is to form a hypothesis.

4. The fourth step is to test the hypothesis by conducting an experiment. The fifth step is to analyze the data and draw a conclusion. The sixth step is to communicate the results of the experiment.

5. The seventh step is to repeat the experiment to verify the results.

6. The eighth step is to publish the results of the experiment in a scientific journal.

7. The ninth step is to use the results of the experiment to develop a theory.

8. The tenth step is to use the theory to make predictions about the future.

9. The eleventh step is to test the predictions of the theory by conducting an experiment.

10. The twelfth step is to repeat the experiment to verify the results.

11. The thirteenth step is to publish the results of the experiment in a scientific journal.

12. The fourteenth step is to use the results of the experiment to develop a theory.

13. The fifteenth step is to use the theory to make predictions about the future.

14. The sixteenth step is to test the predictions of the theory by conducting an experiment.

15. The seventeenth step is to repeat the experiment to verify the results.

16. The eighteenth step is to publish the results of the experiment in a scientific journal.

17. The nineteenth step is to use the results of the experiment to develop a theory.

18. The twentieth step is to use the theory to make predictions about the future.

19. The twenty-first step is to test the predictions of the theory by conducting an experiment.

20. The twenty-second step is to repeat the experiment to verify the results.

21. The twenty-third step is to publish the results of the experiment in a scientific journal.

22. The twenty-fourth step is to use the results of the experiment to develop a theory.

23.

24. The twenty-fifth step is to use the theory to make predictions about the future.

25. The twenty-sixth step is to test the predictions of the theory by conducting an experiment.

26. The twenty-seventh step is to repeat the experiment to verify the results.

27. The twenty-eighth step is to publish the results of the experiment in a scientific journal.

28. The twenty-ninth step is to use the results of the experiment to develop a theory.

29. The thirtieth step is to use the theory to make predictions about the future.

30. The thirty-first step is to test the predictions of the theory by conducting an experiment.
