## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

3940' T.D. - Line

In April, 1955 this well was perforated in 5 1/2" OD casing 3200 to 3210' & 3228' to 3244', Upper 7-Rivers, which proved non-commercial, a packer was set at 3781' and well was completed in open hole, 7-7/8", from 3896 to 3940'. We plan to pull packer and put well to pumping.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
