Scale (Federal) #1

November 23, 1954

Well No. 1 is located 1983.4 ft. from S line and 641.1 ft. from W line of sec. 34

24 Sec. and Sec. No.) 24-4 (Twp.) 15-1 (Range) 101W (Meridian)  
Elmest Can Pool (Field) Las Cruces (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well with rotary tools at the above location to a total depth of approximately 4100 feet. All casing will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following casing patterns: 9 5/8" casing to be set at approximately 500' and cemented with 450 sack of cement to be circulated to surface; 7" casing to be set at approximately 4100' and cemented with approximately 500 sack of cement. Casing to be perforated opposite the pay zones.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
