 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **5540** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drill stem test from 2715' to 2800' in lime formation. Run Halliburton sand testing tool - open 10 minutes, showed little oil and 120' of drilling fluid.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

It is not clear how the authors justify the use of the term "cognitive" in the title of their paper.

REFERENCES

10-11-68 10:00 AM. The other group showed evidence of self-organization, but the overall picture is not as clear as in the first group. The group is still in the process of forming, and the members are still in the process of establishing their roles and relationships. The group is still in the process of forming, and the members are still in the process of establishing their roles and relationships.

1. The first group of people who are likely to be affected by the proposed changes are those who are currently employed in the public sector. This group includes a wide range of individuals, from those who are employed in the civil service to those who are employed in the health service. The proposed changes are likely to have a significant impact on this group, as they will be required to adapt to a new set of rules and regulations. This could lead to a number of problems, including a loss of morale and a decrease in productivity. It is therefore essential that the government takes steps to ensure that this group is adequately supported and that their interests are protected.
