Re: Reclassification of Well -- Eumont Pool
H. T. Orcutt (NCT-C) Com Well #5-P
Section 36, T20S, R36E

Gentlemen:

Due to the recently submitted gas/oil ratio test the above-referenced well will be reclassified from a gas well to an oil well in the Eumont Pool effective October 1, 1990.

If for some reason you feel this test does not properly reflect the classification of this well, please submit another test for our consideration. It is my understanding that this well has been placed on pump which may account for the increased condensate production. If you need additional time to determine proper classification of this well, please advise.

If the well is to be reclassified to oil, please furnish this office with a revised acreage dedication plat, Form C-102, outlining the 40-acres dedicated to the oil well completion. Also, if the gas transporter changes due to this reclassification, please submit Form C-104 so indicating.

Very truly yours,

OIL CONSERVATION DIVISION
