FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

On Form C-101 Notice of Intention to Drill filed October 1, 1948, to cover the drilling of this well we indicated that productive oil and gas was anticipated at a depth of approximately 4250' and that 7" casing would be set and cemented at approximately 4300'. However, oil production was not encountered in this wildcat well at the anticipated depth, the 7" casing was not set as originally planned and we now propose to deepen this well to approximately 7050' and if commercial production is encountered, 7" casing will be set and cemented at approximately 7050'. No change in surface and intermediate casing program is involved.
