The elevation of the derrick floor above sea level is **3691** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to clean wellbore of frac sand to 4001' PHD; scrape the present perforations; perforate interval 3990'-4000'; run packer w/hydraulic holddown and fracture through the added perforations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
