Re: Application for Exception to
Rule 5(a), Order R-520 for
Amerada Gulf State MNT No. 1,
Eumont Gas Pool

Gentlemen:

By this letter of application Amerada Petroleum Corporation
wishes to state the following:

- (a) That Amerada Petroleum Corporation Amerada-Gulf State MNT No. 1, located 990 feet FSL and 1650 feet FWL of Section 5, Township 19 South, Range 37 East, Lea County, New Mexico, is a gas well in the Eumont Gas Pool completed December 14, 1956.
- (b) That the applicant proposes to assign this well a non-standard gas proration unit in the Eumont Gas Pool consisting of 160 acres which is the SW/4 of Section 5, Township 19 South, Range 37 East. (Attached Exhibit "A").
- (c) That the proposed non-standard gas proration unit lies wholly within a single governmental section.
- (d) That the proposed non-standard gas proration unit may reasonably be presumed to be productive of gas.
- (e) That the proposed non-standard gas proration unit does not exceed 5280 feet in length or width.
- (f) That by copy of this letter of application all operators owning interests (1) in the subject section and (2) within 1500 feet of the subject well of the proposed gas unit are notified by registered mail of this proposed non-standard gas proration unit.

Figure 1 is a schematic representation of the experimental design. It shows a sequence of events: 'Stimulus presentation' (with a box for 'Stimulus duration'), 'Response', 'Feedback', and 'Inter-trial interval'. A 'Trial' box encompasses the 'Stimulus presentation' and 'Response' phases. A 'Block' box encompasses multiple trials. A 'Session' box encompasses multiple blocks. A 'Day' box encompasses multiple sessions. The 'Stimulus presentation' phase includes a 'Stimulus' box and a 'Response' box. The 'Response' phase includes a 'Response' box and a 'Feedback' box. The 'Inter-trial interval' phase includes a 'Feedback' box and an 'Inter-trial interval' box.
