New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Gentlemen:

By letter dated December 6, 1957, Mr. R. F. Montgomery, Proration Manager, notified The Texas Company it would be necessary to obtain a No Flare Order not later than February 18, 1958, for its State of New Mexico "CE" Well No. 1, in order to comply with the provisions contained in order R-553. This well is located in Unit E, Section 6, Township 19, Range 37, Eumont Pool, Lea County, New Mexico.

The January, 1958 proration schedule indicates a gas-oil ratio of 1392 feet and an oil allowable of 37 barrels, which results in 51.5 MCF of gas per day being flared.

This well was originally under contract to Phillips Petroleum Company, however they have advised us it would be uneconomic for them to connect and take this gas. For this reason The Texas Company is now in the process of contacting another purchaser for the sale of the gas from this well, and respectfully requests a 60-day exception to the No Flare Order R-553.

Attached are three copies of a plat showing the well and tank battery location, offset ownership, and the location of existing gas gathering lines in the vicinity.

Yours very truly,

H.N. Wade
Petroleum Engineer
