# THEORY OF THE EARTH

## CHAPTER I

### OF THE ORIGIN OF THE EARTH

The first question which presents itself to the mind is, what was the origin of the earth? The answer to this question is, that the earth was created by the power of God, and that it was created out of nothing. The second question is, when was the earth created? The answer to this question is, that the earth was created at the beginning of time, and that it has since continued to exist.

### OF THE FORM AND SIZE OF THE EARTH

The third question which presents itself to the mind is, what is the form and size of the earth? The answer to this question is, that the earth is a sphere, and that its diameter is about 8000 miles. The fourth question is, what is the weight of the earth? The answer to this question is, that the weight of the earth is about 6000 trillion tons. The fifth question is, what is the temperature of the earth? The answer to this question is, that the temperature of the earth is about 50 degrees Fahrenheit.

### OF THE AIR AND WATER OF THE EARTH

The sixth question which presents itself to the mind is, what is the air and water of the earth? The answer to this question is, that the air of the earth is composed of oxygen and nitrogen, and that the water of the earth is composed of hydrogen and oxygen. The seventh question is, what is the origin of the air and water of the earth? The answer to this question is, that the air and water of the earth were created by the power of God, and that they have since continued to exist. The eighth question is, what is the weight of the air and water of the earth? The answer to this question is, that the weight of the air and water of the earth is about 1000 trillion tons.

### OF THE FIRE AND EARTH OF THE EARTH

The ninth question which presents itself to the mind is, what is the fire and earth of the earth? The answer to this question is, that the fire of the earth is composed of hydrogen and oxygen, and that the earth of the earth is composed of silicon and oxygen. The tenth question is, what is the origin of the fire and earth of the earth? The answer to this question is, that the fire and earth of the earth were created by the power of God, and that they have since continued to exist. The eleventh question is, what is the weight of the fire and earth of the earth? The answer to this question is, that the weight of the fire and earth of the earth is about 1000 trillion tons.

### OF THE AIR AND WATER OF THE EARTH

The twelfth question which presents itself to the mind is, what is the air and water of the earth? The answer to this question is, that the air of the earth is composed of oxygen and nitrogen, and that the water of the earth is composed of hydrogen and oxygen. The thirteenth question is, what is the origin of the air and water of the earth? The answer to this question is, that the air and water of the earth were created by the power of God, and that they have since continued to exist.

### OF THE FIRE AND EARTH OF THE EARTH

The fourteenth question which presents itself to the mind is, what is the fire and earth of the earth? The answer to this question is, that the fire of the earth is composed of hydrogen and oxygen, and that the earth of the earth is composed of silicon and oxygen. The fifteenth question is, what is the origin of the fire and earth of the earth? The answer to this question is, that the fire and earth of the earth were created by the power of God, and that they have since continued to exist.
