

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF	XXX	NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL

Place

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

The Texas Company's State "G" Well No. G-1 in SW 1/4
Company or Operator Lease
of Sec. 19, T. 19 S, R. 37 E, N. M. P. M., Monument Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

T.D. 3850' Lime.

Set and cemented 3832' of 7" OD 24# 10thd seamless casing at 3850' with 400 sacks El Toro regular cement. Completed cementing 1PM 4-1-36; Halliburton method.

Will drill plug and test casing by pressure method at 1PM 4-5-36.

DUPLICATE

Approved APR 4 1936, 19_____
except as follows:

Introduction

1.1.1. The first part of the course

The first part of the course is devoted to the study of the properties of the function $f(x) = \sin(x)$. We will see that this function is periodic and that it has a maximum value of 1 and a minimum value of -1. We will also see that the function is odd, meaning that $f(-x) = -f(x)$.

1.1.2. The second part of the course

The second part of the course is devoted to the study of the properties of the function $f(x) = \cos(x)$. We will see that this function is periodic and that it has a maximum value of 1 and a minimum value of -1. We will also see that the function is even, meaning that $f(-x) = f(x)$.

1.1.3. The third part of the course

The third part of the course is devoted to the study of the properties of the function $f(x) = \tan(x)$.

1.1.4. The fourth part of the course

The fourth part of the course is devoted to the study of the properties of the function $f(x) = \cot(x)$.

1.1.5. The fifth part of the course

1.1.5.1. The first part of the fifth part

The first part of the fifth part

The first part of the fifth part is devoted to the study of the properties of the function $f(x) = \sec(x)$.

The second part of the fifth part is devoted to the study of the properties of the function $f(x) = \csc(x)$.

The third part of the fifth part is devoted to the study of the properties of the function $f(x) = \operatorname{arcsin}(x)$.

The fourth part of the fifth part is devoted to the study of the properties of the function $f(x) = \arccos(x)$.

The fifth part of the fifth part is devoted to the study of the properties of the function $f(x) = \arctan(x)$.

The sixth part of the fifth part is devoted to the study of the properties of the function $f(x) = \operatorname{arccot}(x)$.

The seventh part of the fifth part is devoted to the study of the properties of the function $f(x) = \operatorname{arcsinh}(x)$.

The eighth part of the fifth part is devoted to the study of the properties of the function $f(x) = \operatorname{arccosh}(x)$.

The ninth part of the fifth part is devoted to the study of the properties of the function $f(x) = \operatorname{artanh}(x)$.

The tenth part of the fifth part is devoted to the study of the properties of the function $f(x) = \operatorname{arctanh}(x)$.
