Detailed account of work done, nature and quantity of materials used, and results obtained.

During May, 1962, rods and tubing were pulled from the well after production had declined to approximately 1 BOPD. The well is now standing. A cooperative secondary recovery study with other operators in the area is now in progress, and this well will be included in the project if and when it materializes.

Witnessed by J. D. Hamilton	Position Production Foreman	Company Standard Oil Company of Texas, A Division of California Oil Company
