

NEW MEXICO OIL CONSERVATION COMMISSION

SANTA FE, NEW MEXICO

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF		NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL		Notice of intention to plug back	X

Monument, New Mexico,

Place

November 13, 1948

Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Amerada Petroleum Corporation Phillips A Well No. 3 in NE 1/4
Company or Operator Lease

of Sec. 31, T. 19S, R. 37E, N. M. P. M., Monument Paddock Field.
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

11019' Total Depth Granite, Top of Granite 11006'. Finished drilling 7 7/8" Hole at 12 Noon November 12, 1948. Will Run Schlumberger Well Survey, Caliper Survey, Dip Meter Survey and Gamma Ray Survey.

We propose to plug back well w/ 10 sack plug of cement at top of Ellenberger at 10935', and 10 sack plug at top of Simpson at 10375' and 30 sacks of cement in bottom of 8 5/8" at 5345'.

NOV 15 1948

Approved _____, 19____
except as follows:

Amerada Petroleum Corporation
Company or Operator

By Don Topp

Position Asst. Dist. Supt.
Send communications regarding well to

Name Amerada Pet. Corp.Address Drawer D, Monument, New Mexico.

OIL CONSERVATION COMMISSION,

By Roy Garbarino
Title OIL & GAS INSPECTOR

The first part of the paper discusses the importance of understanding the underlying mechanisms of the system. This involves a thorough analysis of the data and the identification of the key variables that influence the system's behavior. The second part of the paper focuses on the development of a model that can accurately predict the system's response to different inputs. This model is then used to simulate the system's behavior under various conditions, allowing us to gain insights into its performance and identify potential areas for improvement.

The results of the simulations show that the model is able to accurately predict the system's behavior, with a high degree of correlation between the predicted and actual values. This indicates that the model is a good representation of the system and can be used to make reliable predictions. However, there are some limitations to the model, particularly in terms of its ability to handle complex, non-linear relationships between the variables. Future work should focus on developing more sophisticated models that can better capture these relationships and improve the accuracy of the predictions.

In conclusion, this paper has presented a detailed analysis of the system's behavior and a model that can accurately predict its response to different inputs. The results of the simulations show that the model is a good representation of the system and can be used to make reliable predictions. However, there are some limitations to the model, particularly in terms of its ability to handle complex, non-linear relationships between the variables. Future work should focus on developing more sophisticated models that can better capture these relationships and improve the accuracy of the predictions.
