Re: Chevron USA Inc.
B.V. Culp NCT-B #2
Unit I, Sec. 31, T19S, R37E
(No. Monument G/SA Unit Blk 15 Well #9)

Gentlemen:

We have been contacted by Brian Cotner with Chevron concerning the above-referenced well. He indicated Amerada shows this wellbore to be perforated 3533--3704 which are perforations outside the unitized interval and therefore would need to be squeezed.

According to records on file in the OCD office this well is an openhole completion 3794--3901'. We do not show the work you list on your schematic as being done in 1987. According to Mr. Cotner Chevron does not have records on this work either.

Please verify this information and advise where it was obtained. If this proves to be erroneous information this wellbore should be acceptable.

Very truly yours,

OIL CONSERVATION DIVISION
