except as follows:

OIL CONSERVATION COMMISSION,

By \_\_\_\_\_

Title \_\_\_\_\_

**Gulf Oil Corp - Gypsy Division.**

Company or Operator

By \_\_\_\_\_

Position **District Supt.**

Send communications regarding well to

Name **C. C. Cummings.**Address **Hobbs, New Mexico.**

# THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its various parts.

## THE EARTH'S HISTORY

The earth's history is a long and complex one. It begins with the formation of the earth from a cloud of gas and dust. The earth then passes through a series of stages, each of which is characterized by different geological processes.

## THE EARTH'S STRUCTURE

The earth's structure is a complex one. It is divided into several layers, each of which has its own characteristics. The layers are the crust, the mantle, and the core.

## THE EARTH'S SURFACE

The earth's surface is a complex one. It is shaped by a variety of processes, including erosion, deposition, and tectonic movement. The surface is also covered by a variety of different types of vegetation.

## THE EARTH'S CLIMATE

The earth's climate is a complex one. It is determined by a variety of factors, including the amount of solar radiation that reaches the earth, the amount of water vapor in the atmosphere, and the amount of carbon dioxide in the atmosphere.

## THE EARTH'S BIOSPHERE

The earth's biosphere is a complex one. It is the part of the earth that is inhabited by living organisms. The biosphere is shaped by a variety of factors, including the amount of solar radiation that reaches the earth, the amount of water vapor in the atmosphere, and the amount of carbon dioxide in the atmosphere.
