

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS	X	REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I. THE EARTH AND ITS HISTORY

The Earth is a sphere, and its history is the history of the changes which have taken place in its form and composition since its origin. The history of the Earth is divided into three main periods: the Primary, the Secondary, and the Tertiary.

The Primary period is the earliest, and is characterized by the formation of the Earth's crust and the development of the primary life. The Secondary period is the middle period, and is characterized by the formation of the secondary life and the development of the secondary life. The Tertiary period is the latest, and is characterized by the formation of the tertiary life and the development of the tertiary life.

The history of the Earth is a continuous process, and the changes which have taken place in its form and composition are the result of the action of natural forces. The history of the Earth is a story of the growth and development of the Earth, and of the life which has lived upon its surface.
