17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well no longer produces commercial quantities of hydrocarbons. The perforated interval is from 3438-3596. A TIW JSAC packer with mechanical holddown is stuck at 3398'. We propose to P & A in the following manner. 25 sx over the perforated interval 3438-3596; cut off 2-1/2" tbg at 3390'. Spot 15 sx from 3390-3265 and 10 sx in top of 5-1/2" csg. 9# mud will be left in the hole between all cement plugs. A standard dry hole marker will be installed and location will be cleaned up & levelled to satisfy NMOCC regulations.

Verbally approved by NMOCC 6/20/67.

8. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
