

HUMBLE OIL & REFINING COMPANY

New Mexico Oil Conservation Commission

February 6, 1956

Page 2

4. The gas proration unit consists of 640 acres lying wholly within a single governmental section. The unit consists of contiguous quarter-quarter sections.
5. The entire gas proration unit may reasonably be presumed to be productive of gas.
6. The length or width of the proration unit does not exceed 5280 feet.
7. All offset operators have been notified of this application by registered mail.
8. Attached is a fully executed "Designation of Pooled Unit for Gas Proration, Basement Gas Pool, Lea County, New Mexico."
9. According to our records all of the owners of the royalty or overriding royalty interest in the unit have been contacted and all have executed a pooling agreement to the various leases, similar to the form attached, except the three persons shown below, who own a very small interest.

Ethel B. Hailough of Tulsa, Oklahoma, who owns a 1/10 of 1/8 royalty interest under the NE/4 of NE/4 of Section 4, T-20-S, R-37-N, has so far refused to sign a pooling agreement to our lease although she has executed a pooling agreement to El Paso's lease in the unit. We believe she will eventually execute either a pooling agreement or a royalty Division Order.

Wanda Cooper owns a 7/300 of 1/8 royalty interest under the NE/4 of NE/4 of Section 4 and we have written to her at her last known address but have not received a reply. We have made several attempts to contact her in person, without success.

Martin Hughes, who owns a 15/300 of 1/8 royalty interest in the NE/4 of NE/4 of Section 4, has been contacted by mail at his last known address but so far has refused to sign a pooling agreement to our leases.
10. We have attached a gas proration unit plat which dedicates 640 acres described as Section 4, T-20-S, R-37-N, Lea County, New Mexico.
