

**NEW MEXICO OIL CONSERVATION CO. COMMISSION**  
**Santa Fe, New Mexico**

**MISCELLANEOUS REPORTS ON WELLS**

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

The first of these is the fact that the human race is not a homogeneous mass, but is divided into many distinct groups, each with its own characteristics. These groups are known as races, and they are distinguished from one another by their physical and mental qualities. The second fact is that these races have not remained stationary, but have changed and developed over time. The third fact is that the human race is a product of natural selection, and that the fittest individuals survive and reproduce, while the less fit are淘汰.

The study of the human race is a complex task, and it requires the cooperation of many different sciences. The most important of these are biology, psychology, and sociology. Biology deals with the physical characteristics of the human race, and psychology deals with the mental characteristics. Sociology deals with the social organization of the human race, and it is the study of the relationship between the individual and the group. The study of the human race is also a practical task, and it is important to understand the human race in order to improve the human condition.

The human race is a remarkable creature, and it is a privilege to study it. We are fortunate to live in an age when the study of the human race is possible, and we are hopeful that the study of the human race will continue to progress in the future.

The human race is a complex and fascinating subject, and it is a pleasure to study it. We are grateful to the Royal Anthropological Institute for its support of the study of the human race, and we are hopeful that the study of the human race will continue to progress in the future.
