(FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

Laughlin Well No. 1 recently produced 166 barrel of water in 24 hours on a pumping test. It is proposed to clean-out to bottom, test casing, run spinner, radio-active and caliper surveys, set a drillable formation packer on a drillable anchor, squeeze off bottom pay section with cement, back-off packer leaving packer and anchor cemented in bottom of hole and wash the upper section with acid if necessary. It is believed that this will materially reduce or eliminate the excessive water production.
