## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This battery was centralized January 1, 1937 to accommodate Well No. 4, thereby enabling us to produce this well without purchasing additional separator and tankage.

There are three 500 barrel stock tanks and one 500 barrel test tank on this lease with one common separator and one test separator. One well will be kept on test at all times except while test tank is being run by pipe line company.

The wells are turned into the test system consecutively as numbered, giving us an accurate test of oil produced by each well.
