1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets. 2. The second step is to analyze the data. This involves looking at the sales figures for each product line and identifying any trends or patterns. 3. The third step is to develop a plan. This involves setting specific goals for each product line and determining the actions that need to be taken to achieve those goals. 4. The fourth step is to implement the plan. This involves putting the plan into action and monitoring the results. 5. The fifth step is to evaluate the results. This involves comparing the actual results to the targets and determining if the plan was successful. If not, the plan needs to be revised and implemented again.
