The elevation of the derrick floor above sea level is 3573 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In accordance with Notice of Intention to Gas Lift approved 7-30-51, flow valves were installed in Britt A-6 No. 2 and the well tested 100% water through perforations 3848 to 3877' in the 4" liner.

It is therefore proposed to set a retainer at 3844' and squeeze off the present perforations. The 4" liner will be perforated from 3822 to 3825', 3828 to 3836', and 3806' to 3814', tested and acidized if necessary, in an attempt to restore production of oil.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
