The elevation of the derrick floor above sea level is 3573 ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The production from Britt A-6 No. 2 decreased to an average of 1 1/2 barrels of oil and 415 barrels of water per day pumping.

It is therefore proposed to install gas lift equipment, using gas from the Britt A-6 No. 4 Bradenhead.

Gas used for gas lifting this well will be reported on "Monthly Report of Gas Used for Gas Lift Operations".

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
