

NE MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

CLINICAL TRIALS OF ANTICANCER DRUGS

The purpose of this article is to discuss the problems involved in the clinical trials of anticancer drugs. The author points out that the evaluation of these drugs is a complex task, requiring a combination of laboratory and clinical studies. He emphasizes the importance of understanding the mechanism of action of the drug and the need for careful monitoring of side effects.

From the Department of Medicine, University of California, San Francisco.

Received for publication June 15, 1957. Accepted for publication July 10, 1957.

The author is grateful to the National Cancer Institute for its generous support of this work.
