

April 17, 1972

The current proration unit allowable of 107 barrels oil per day would allow another 92 barrels oil per day to be produced from the proposed completion in Well No. 5.

- (3) G. C. Matthews Well No. 5 has seven inch (7") casing set at 5779' and cemented with 650 sacks. Top of cement behind the 7" casing as indicated by a temperature survey is at 2660'. The well was recently reclassified from oil to gas by virtue of Commission ruling on gas well definition.
- (4) The proposed mechanical installation is shown on the attached diagrammatic sketch. This method of dual completing is mechanically feasible and practical.
- (5) This application is in the interest of prevention of waste and the protection of correlative rights.
- (6) The attached list of offset operators are being notified by copy of this application.

Yours very truly,

H. E. Braunig, Jr.
